CDC/ATSDR Information Quality Peer Review

CDC/ATSDR Peer Review Agenda

Title

NIOSH Manual of Analytical Methods, 5th Edition (Note: A total of 11 new or updated methods will be reviewed separately since different types of expertise are needed for each method. Each method undergoes evaluation in an independent laboratory.)

Subject

Collection of methods to sample and analyze contaminants in workplace air and worker blood and urine

Purpose

To provide information on analytical methods, quality assurance, method evaluation, biological monitoring, aerosols, and special measurement considerations.

Type of Review

Individual Reviews

Timing of Review

September 2005 through June 2006

Number of Reviewers

4 to 10
